

General Technology Resources

Organizations and web sites that help you increase your access to and ability to use technology. Many of these sites have extensive lists of resources.

- **CompuMentor** (<http://www.compumentor.org>) also makes software available to non-profits at heavily reduced prices, as well as providing other technology resources.
- **Coyote Communications** (<http://www.coyotecom.com/>) provides tip-sheets and resources for non-profit organizations
- **Gifts in Kind International** (<http://www.giftsinkind.org>) helps non-profits receive donations of software.
- **Idealist** (www.idealist.org) helps match non-profit organizations with consultants and volunteers.
- **LINC Project** (<http://www.lincproject.org>) helps low income organizations integrate technology into their campaigns. This web site has some examples of how grassroots groups are using technology to support their efforts.
- **Non-Profit Genie** (<http://www.genie.org>) is another "portal" or web directory of resources for non-profit organizations.
- **NPower** (<http://www.npower.org>) helps non-profits use technology to better serve their communities.
- **ONE/Northwest** (Online Networking for the Environment) (<http://www.onenw.org>) is a non-profit organization based in Seattle, providing technology assistance to conservation activists and organizations in Alaska, British Columbia, Idaho, Montana, Oregon and Washington. ONE/NW has an excellent collection of technology resources for non-profit advocacy organizations.
- **Progressive Technology Project (PTP)** (www.progressivetech.org) works to build the capacity of grassroots community-based organizations to use technology for their work.
- **TechSoup** (<http://www.techsoup.org>) is a comprehensive directory of technology resources for non-profits.
